Don't
Let Friends
Use
Halftones.**

Combine the power of Photoshop and Illustrator to create the ultimate separation and design tool for creating award winning garment prints.

No matter what size or type of press, Screenprint Separator 2000 can build an optimal separation for your needs.

Screenprint Separator 2000 can create separations in spot color or process color for every situation.

Our newly developed 6 and 8 color opaque process system prints high resolution photographic images on darks and lights with just one flash.

Printing with our famous random square dot means no screen angles or moire, and our unique color proofing system has made us number one with screen printers around the world.

Screenprint Separator's **automatic color bars** make it easy to get perfect color every time.

Print and proof your film positives on an ink jet printer with the resolution of an image setter.

get paid for every job you do!

print film positives on your inkjet printer up to 17x22 inches.

call about our easy payment plan.
