

Some Solutions Really Suck.

www.posjet.com

A modified Epson 3000 cartridge draws ink through a tube from a bottle.

Our new HIGH DENSITY black works perfectly with this system!

You will never see the out of ink light again!

The bottle has an air filter to let air in and keep dust out.

Dual lines allow you to bleed the system of all air bubbles.

The wide mouth screw top makes it easy to add ink.

Functions just like a regular 3000 ink jet cartridge.
